

Junior Reservoir Engineer

Summary

- **Title:** Junior Reservoir Engineer
- **Contract Type:** Temporary or permanent position
- **Base Location:** Rueil-Malmaison, near Paris, France, with missions abroad
- **Job Reference:** 2018-Res-Junior

Job Overview

Beicip-Franlab is a world leading consulting company providing software and services to help oil and gas professionals in interpreting subsurface data and assessing exploration and production risks and opportunities.

A successful candidate will be expected to work directly in an integrated project team composed of geophysicists, geologists and reservoir engineers. Daily tasks will include production performance analysis and building of dynamic simulation models in order to optimize client's development strategies. You will use the company's innovative reservoir simulation software as well as other standard industry tools.

You will be based in our main office near Paris in France with opportunities to travel abroad.

The role is ideally suited for candidates who wish to:

- Work in a dynamic and motivating environment;
- Seek opportunities to work on a wide range of fields and technical challenges;
- Take early responsibilities.

Responsibilities

The successful candidate will be reporting directly to the project leader and will be expected to:

- Perform basic reservoir engineering analysis, material balance, dynamic simulation studies (model initialization, assisted history matching and performance prediction), and uncertainties estimation;
- Work actively in an integrated project team (with geophysicists, geologists and reservoir engineers);
- Report to the project leader regularly on project advancement;
- Be able to present results to the clients;
- Apply new methods and be able to use creativity in optimizing field development using leading edge technologies and tools.

Preferences

The successful candidate will have:

- An Msc/PhD in Petroleum/Reservoir Engineering;
- First Experience (training period / first experience) in the Oil & Gas industry is a plus;
- A commitment for mobility as the job may include short-term and long-term missions overseas;
- Strong interpersonal and communication skills, written and oral;
- A confident and assertive personality with the ability to provide effective technical leadership and articulate strong technical arguments;
- Fluent English and French mandatory, Spanish advantageous;
- Legal right to work in France without company sponsorship.
