

# Junior Seismic Interpretation Specialist

## Summary

- **Title:** Junior Seismic Interpretation Specialist
- **Contract Type:** 6-month temporary position
- **Base Location:** Rueil-Malmaison, near Paris, France
- **Job Reference:** 2019-Seis-Interp-Junior
- **Starting Date:** May 1, 2019
- **Application Deadline:** April 15, 2019

## Job Overview

Beicip-Franlab is a world leading consulting Company providing services and software to help oil and gas professionals in interpreting subsurface data and assessing exploration and production risks and opportunities. Beicip-Franlab is seeking a Seismic Interpretation Specialist to support the development of its activities.

As a Junior Seismic Interpretation Consultant, you will be expected to work directly in an integrated project team composed of experienced geophysicists, geologists and reservoir engineers. You will apply geophysical technologies and interpretation skills to perform prospect evaluation, geological modelling and reservoir characterization for Oil & Gas Company's exploration, appraisal and development drilling programs.

The successful candidate must have basic knowledge of structural and stratigraphic interpretation from seismic and geological data. Knowledge in other associated subjects, such as gravity or magnetic analysis would be a plus.

You will be based in our main office near Paris in France with opportunities to travel abroad.

The role is ideally suited for candidates who wish to:

- Work in a dynamic and motivating environment;
- Seek opportunities to work on a wide range of fields and technical challenges;
- Take early responsibilities.

## Responsibilities

Acting as Junior Consultant, you will directly report to the Structural and Stratigraphic Interpretation Team Leader and Project Leaders. You will be expected to:

- Perform key 2D and 3D seismic interpretation tasks: seismic-to-well calibration, structural and stratigraphic interpretation, velocity model analysis, and depth conversion and mapping;
- Work actively in an integrated project team (with geophysicists, geologists and reservoir engineers);
- Apply industry standard tools to map and describe prospects, understand reservoir properties, quantify risk, and participate in volumetric and reserves estimations;
- Participate to the presentation and discussion with the client from data collection to the results delivery;
- Apply innovative methods and solutions to optimize prospects evaluation and field development thanks to an access to leading edge technologies.

## Preferences

Beicip-Franlab is looking for highly motivated individuals with the following qualifications:

- An M.Sc / Ph.D degree in Geophysics or Geology;
- First Experience in the Oil & Gas industry is a plus;
- A commitment for mobility as the job may include short-term and long-term missions overseas;
- Strong interpersonal and communication skills, written and oral;
- A confident and assertive personality with the ability to provide effective technical leadership and articulate strong technical arguments;
- Proficiency with standard software packages for seismic interpretation;
- Fluent English and French mandatory, other language advantageous;
- Legal right to work in France without company sponsorship.
