

The right route to Exploration Success:

Experience, Innovation, Reliability

Choose an international expert to discover oil and gas beyond today's horizons.

In today's economic context every dollar spent in exploration needs to be carefully weighted. The key to success requires expertise, agility, imagination and a mastery of innovative workflows and techniques. Beicip-Franlab has a unique track record in advising oil and gas companies, governments and institutions, making the right decisions in Exploration all over the world. Mature basins, onshore, offshore, deep offshore, tight reservoirs, whether you look for subtle traps, deep traps, oil or gas, we will help you drill your next successful exploration well.

- Regional assessment
- Plays and prospect evaluation
- Mature basin reexploration
- Offshore, deep offshore
- Thrust zones, compressive basins
- Non conventional oil and gas
- Subtle traps
- Stratigraphic traps (DionisosFlow)
- Petroleum System Modeling (TemisFlow)
- Flexible multidisciplinary workflows
