Junior Petroleum Geologist

Job Overview

Beicip-Franlab is a world leading consulting Company providing software and services to help oil and gas professionals in interpreting subsurface data and assessing exploration and production risks and opportunities.

We are seeking a Junior Geologist who will be part of a team of specialists and experts in petrophysics, reservoir/basin geomodeling, stratigraphy/sedimentology, and fractured reservoirs in order to perform integrated field development studies with geophysicists and reservoir engineers.

Candidates will be proficient with the Company's innovative range of software products as well as industry standard industry packages. A good knowledge of petroleum geology will be appreciated.

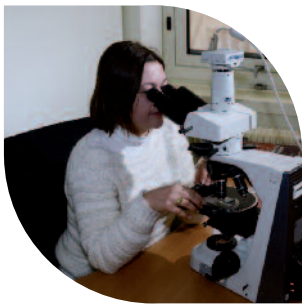

Responsibilities

Reporting directly to the Project Manager, the successful candidate will be expected to:

- perform subsurface data loading
- work on geological interpretation and integration of geological data in various stratigraphic and structural settings
- work as Junior Geologist on petrophysics, stratigraphy, sedimentology or 2D and 3D reservoir modeling, including deterministic and stochastic geocellular modeling techniques
- work effectively in multi-disciplinary environments within integrated teams of geologists, geophysicists and reservoir engineers
- participate in report writing and generation
- possess good communication skills
- participate in presentations of results to our clients

Preferences

- Minimum of 1 year experience in subsurface geology, gained during an internship within Oil Companies
- Strong interpersonal and communication skills, written and oral, an essential requirement
- A commitment for mobility as the job implies overseas missions
- A confident and assertive personality with the ability to provide effective technical support to answer clients' expectancies
- Previous overseas experience, an advantage
- Fluent English mandatory. Spanish/French, an advantage

Career

- Manager of exploration or field development integrated projects (on site or abroad)
- Team Leader for petrophysicists, reservoir/basin geomodelers, or fractured reservoir specialists
- Specialized expert in reservoir or exploration geology (geostatistics, petroleum system analyst...)
- Business Development Manager
- Software support and sales specialist

Package

This position will be well rewarded and will include bonuses as well as personal training opportunities and other benefits.
