# Senior Petroleum Geologist Project Manager

## Job Overview

Beicip-Franlab is a world leading consulting Company providing software and services to help oil and gas professionals in interpreting subsurface data and assessing exploration and production risks and opportunities. We are seeking experienced Senior Geologist to further reinforce the geological team.

As an experienced geologist, you will be involved in reservoir characterization and in reservoir geological modeling for Oil Company's field description and development.

Leading or working directly with a dedicated team of geophysicists, petrophysicists, specialists of reservoir characterization, geomodelers and reservoir engineers, you will explore, appraise and optimize production for the Oil Company Client. You will use the Company's innovative range of Quantitative Interpretation software products as well as industry standard industry packages. A good knowledge of sedimentology and sequence stratigraphy will be appreciated.

You will be based in the main office in France near Paris or in international offices such as Middle East or South America.

# Responsibilities

Acting as Project Manager and reporting directly to the Director of Operations, the successful candidate will be member of the department of geology and is expected to:

- manage a team and develop integration between geophysical geological and reservoir techniques
- perform integrated studies, from data management to 3D static reservoir models
- compute and assess hydrocarbon in place
- contribute to field development plan
- interact with clients
- coach junior geologists

This is an ideal role for an experienced, innovative and ambitious geologist who wishes to be actively contributing to successful exploration or development projects

# Preferences

The successful candidate will have:

- An MSc or PhD in Geology or Earth Science related degree, an essential requirement
- Minimum of 7 years experience as senior geologist
- An established track record in performing integrated studies
- Strong interpersonal and communication skills, written and oral, an essential
- A confident and assertive personality with the ability to provide effective technical leadership
- Previous experience in publishing and presenting highly acclaimed technical papers
- Commitment for mobility as the job may include short and long-term missions overseas

# Career

- Manager of exploration or field development integrated projects (on site or abroad)
- Team Leader for petrophysicists, reservoir/basin geomodelers, or fractured reservoir specialists
- Specialized expert in reservoir or exploration geology (geostatistics, petroleum system analyst...)
- Business Development Manager
- Software support and sales specialist

# Package

This position will be well rewarded and will include bonuses as well as personal training opportunities and other benefits.
