Senior Petrophysicist Log Analyst

.....

Job Overview

Beicip-Franlab is a world leading consulting Company providing software and services to help oil and gas professionals in interpreting subsurface data and assessing exploration and production risks and opportunities. We are seeking experienced Senior Petrophysicist/Log Analyst to further reinforce the geological team.

As an experienced petrophysicist, you will be involved in reservoir characterization and evaluation studies in development and exploration fields and/or oil-in-place studies. Specific tasks in petrophysics include analysis and integration of petrophysical data (core analysis results) and interpretation of well logs.

Leading or working directly with a dedicated team of geophysicists, petrophysicists, geologists, specialists in reservoir characterization, geomodellers and reservoir engineers, you will explore, appraise and optimize production of various clients. Specific interaction of petrophysics with reservoir engineering, seismic characterization and geomodelling specialists is frequent. In order to assume this responsibility, you will use the Company's innovative range of software products as well as industry standard industry packages. Good knowledge of geology and integrated reservoir study workflows will be valuable.

You will be based in our main office in France near Paris or in international offices such as Middle East or South America.

.....

Responsibilities

Acting as Senior Petrophysicist in projects and reporting to the Project Manager or Team Leader, the successful candidate will be member of the Geology department and is expected to:

- perform petrophysical and log analysis studies, including analysis of SCAL data and quantitative log interpretation using quick-look, deterministic and/or probabilistic log analysis methods
- have good knowledge of log analyses techniques and methods and their field of application
- perform integrated studies interacting with specialists in other disciplines, from data management to 3D reservoir models and field development plans
- compute and assess in place hydrocarbon
- interact with clients
- coach junior Petrophysicists

This is an ideal role for an experienced, innovative and ambitious Petrophysicist who wishes to actively contribute to successful exploration or development projects

Preferences

The successful candidate will have:

- An MSc or PhD in Geology or an Earth Sciences related degree, an essential requirement
- Minimum of 5 years' experience in petrophysics or log analysis. Good working knowledge of log analysis software, a highly appreciated asset
- An established track record in performing log analysis and integrated studies
- Strong interpersonal and communication skills, written and oral, an essential requirement
- Good working knowledge of English is mandatory, French or Spanish desirable, other languages an advantage
- A confident and assertive personality with the ability to provide effective technical leadership
- Previous experience in publishing and presenting technical papers, a highly appreciated asset
- Previous overseas experience, an advantage
- Commitment for mobility as the job may include short-term and long-term missions overseas

Career

- Manager of exploration or field development integrated projects (on site or abroad)
- Team Leader
- Specialized expert
- Business Development Manager
- Software support and sales specialist

Package

This position will be well rewarded and will include bonuses as well as personal training opportunities and other benefits.
